New this year will be an enhanced Show Guide in a magazine style format, complete with color photos of entrants. In addition to the photo and standard boat information we are also asking for a one or two paragraph bio (subject to editing). It is preferable to have this information sent electronically to BoatShow@lhacbs.org or lhacbs@verizon.net. Pictures should be in JPG or similar format in the largest resolution possible.

We have the ability to scan photos but cannot guarantee the quality. If you do not have decent digital photos and can mail regular photos please do so. We will do our best to return it.

Our chapter also has a decent photo archive of past show photo's. Please visit the photo gallery on our website www.lhacbs.org. If you wish to use one of these please let us know the name of the photo and the directory it is in.

In order to have this new Guide in time for the show we have moved the [deadline of boat entrants to May 23rd](#).

We welcome any and all boats to be part of the show and encourage you to enter more than one boat if you wish. However, since dock space limits the number of boats that we can accommodate in the water, we want to inform those who enter more than one boat that we may ask you to exercise one of the two following options if a waiting list develops. For additional boats you may choose to have a land display, or you may withdraw the boat(s) from the show with your registration fee for that boat(s) refunded.

Preservation vs. Restoration Statement

ACBS has been working to revise its judging criteria to be more supportive of the basic ACBS mission that emphasizes the **preservation** of good vintage boats, without discouraging the major **restoration** of those many boats that have deteriorated to the point that little of their original material can be well preserved if the boats are to be safely used.

This year judging has been further separated into two categories, "**Best Preserved**", where at least 65% of the original wood is maintained, and "**Best Restored**" where 35% or more has been replaced. This is excluding bottom replacement, which is considered a safety item.
